DETAILED ACTION

Drawings

1. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the figures are labeled by hand. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

REASONS FOR ALLOWANCE

2. Claims 1-13 are allowed. The following is a statement of the examiner's reasons for allowance. The present invention relates generally to micro-mechanical devices, and more particularly to a device and method for damping the movable elements of such devices. Regarding claims 1 and 8, the prior art alone or in combination fails to disclose or suggest the method of operating a digital micromirror device comprising the steps of applying a reset voltage pulse to cause the micromirror to launch from a landing plate, applying an offset voltage immediately after the reset voltage pulse, for a damping delay period wherein the micromirror launches and is moving away from the landing plate before an expiration of the damping delay period, applying a damping pulse to the micromirror immediately after the offset voltage, wherein the damping pulse voltage is equal to a bias voltage for the micromirror, and reapplying the offset voltage to the micromirror, whereby the damping pulse reduces oscillation of the

micromirror about a neutral position. The claimed invention is therefore considered to be in condition for allowance as being novel and non-obvious over prior art.

3. The prior art taken either singly or in combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that a rejection under 35 USC 102 or 103 would be improper. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Examiner's Comments

4. New corrected drawings are required as described above. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Other Information/Remarks

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

49 ~~K~~aeriyama (U.S. Patent Publication 2004/0246554) and Chu et al. (U.S. Patent Publication 2004/0233507) disclose similar method of operating digital micromirror device.
